Dear Allen:

Just recently we completed the preparation of a new book entitled "Engineers and Builders for Industry". Basically it is an evaluation of the engineering and construction services of our organization.

While the book contains some written text outlining the scope of our services, our fields of operation, and the geographical areas covered, it is mostly a collection of photographs representative of our work. Sixty years of constructive service to industry are portrayed by the book, with special emphasis on some of our more recent projects.

I thought you might be interested in having a copy to look over and to keep for your library.

In addition to the book you will find enclosed a reprint from the latest "Briefs" picturing Bechtel Corporation's directors and officers. We thought you might like to have a copy of it.

Best regards.

Sincerely yours,
